“*beautifully efficient,*  
the premiere collection of dental furniture”

# The *Renaissance*<sup>™</sup> Story

## The birth of dental furniture

Pelton and Crane's Renaissance<sup>™</sup> collection of dental furniture was created in close collaboration with dentists, dental assistants and hygienists. The result is a beautiful environment that will energize dental professionals and put patients at ease. A host of innovative features improve in-procedure movements, enhance access to technology and optimize storage to improve operator ergonomics and efficiency.

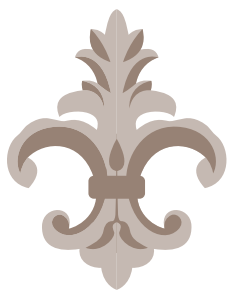

*a relaxing*

ENVIRONMENT

## BEAUTIFULLY APPOINTED TO CREATE THE PERFECT ENVIRONMENT

All Renaissance™ cabinets feature rounded contours, such as the doors and mid-section of the Rear Cabinet, the curved sink area on the Side Cabinet, and the head-end of the Center Island and Side Cabinets. The rounded profiles create a relaxing environment for the doctor, the operator staff and patients. The inviting design extends to the countertops which also feature a pronounced edge profile. Colored wood is used throughout the cabinets, including the inside surfaces. The result is a soft yet distinctive look that transforms the dental operator.

“Step into a world of *easy in-procedure* movements  
and *superior* operator organization.”

*a symphony* OF FEATURES

INTELLIGENT. COMFORTABLE. FUNCTIONAL.

An in-depth study of the movements and storage/accessibility requirements of the doctor, dental assistant and hygienist led to the creation of an integrated operatory solution.

*Renaissance™ conforms to your movements and requirements*

*Sliding monitor/keyboard mount*

*Pocket door system for Rear Cabinet*

*Cabinetette slide out system for Rear Cabinet*

# INNOVATIVE SOLUTIONS

Innovative storage solutions such as a barrier storage module, drawer inserts and out-of-the-way CPU storage organize consumables and equipment around the dental work environment. Numerous electrical, USB and air/water connections are located exactly where needed to improve in-procedure ergonomics. Moreover, a well-lit, side accessible and over 700 in<sup>2</sup> countertop provides an optimal work surface. Soft-close drawers and doors eliminate harsh closing sounds and thus contribute to a harmonious dental practice.
